

Abstract

Resolution WHA (World Health Assembly) No 64/56 Mei 2011, was an International Health Policy which change international mechanism on pandemic influenza global countermeasures. Before this Resolution has ratification as official rules for pandemic influenza countermeasures there was set old mechanism called Global Influenza Surveillance Network (GISN). GISN was built in 1952, and had been working more than 60 th, to help people for being handle the humman global disaster cause by influenza virus. GISN was effectived and efficiented mechanism to figure out pandemic influenza case in world. That was be done on coordination, dedication and expertise laboratoris in entire world. This network has be able to continue supervision evolution deployment and influenza virus distribution. Therefore, GISN cuold be provided timely data and other information, a lot of comperhensive precept, recommendation, and health produce so it is could be fondation for pandemic influenza preparedeness.

Although was a international establishment mechanism , GISN have some weakness that is asked for reformation. GISN didn't have official rules to guard all process of pandemic influenza countermeasures. This weakness cause many problem where is incur losses developement countrys which is near to pandemic influenza case. Based on that problem Indonesia and other development countrys demand WHO (World Health Organization) to change internasional mechanism on pandemic influenza (GISN) so be compitable and will be done on three principles ; equity, equality and transparent

Kay word ; pandemic influenza, WHO, Resolution, World Health Assembly, international mechanism.
